PREFACE

Unlike the three previous Cumulative Indexes which were entirely based upon the annual indexes, the present Index for Volumes 66 to 70 has been compiled as one operation.

The form of entry again follows Dr R C Anderson's Index to Volumes 1-35 as closely as possible, following the rules which were set out in Volume 47 [1961], page 220.

Bibliographical references have been indexed only when the text of an article discusses the work of a particular author at some length. In doubtful cases, preference has been given to foreign and early works.

Like its immediate predecessor, this Index:-

1. Lists Books Reviewed as a central section.

2. Employs Roman type for the Index of Ships' Names: this is in the interests of clarity.

3. Uses underlining to denote volume numbers in the references.

Yarmouth County Historical Society: Index to Shipping of Yarmouth, Nova Scotia, 68, 349.

In this portion of the Index, the date in brackets is, so far as is possible, that of launching or acquisition: if not it is that of the reference. A "?" will denote that it has not been possible to identify the ship concerned, or that a doubtful point is discussed in the text. Where the most that can be deduced from the text is the century in which the ship operated, then that century is defined

Certain references are to the choice of names of ships rather than to the ships themselves; therefore where such a reference relates to a particular name rather than to a ship bearing that name, this has been stated.

Ships are British unless otherwise noted, or if it is not possible to allot a specific nationality. A table of the abbreviations used is set out below:-

Alg.	Algiers	Fin.	Finland	N.	Norway

Du.	Netherlands	Maj.	Majorca		
E.	Egypt	Mex.	Mexico	V.	Venice
F.	France.	Neap.	Naples	Y.	Yugoslavia

It should be emphasised that the names of countries are used in a geographical rather than a political context.
